With partial flavor ban, Trump splits the difference on vaping
The New York Times
The Trump administration recently announced a policy that reflected a partial victory for vaping industry groups, but also seemed aimed at appeasing parents (including the crucial voting bloc of suburban mothers) and public health officials worried about nicotine addiction among teenagers. Federal officials said they would forbid the sale of most flavored e-cigarette cartridges, but would exempt menthol and tobacco flavors, as well as flavored liquid nicotine sold in open tank systems at vape shops.

California vaping bill would ban all flavored tobacco sales in stores
Los Angeles Times
Days after concerns over youth vaping led the Trump administration to announce a partial ban on many e-cigarette pods, California lawmakers on Monday introduced a much stronger measure to outlaw store sales of all flavored tobacco products in the state.

Editorial: More kids are getting hooked on nicotine. It's time for the proper regulations.
St. Louis Post-Dispatch
Although marketers insist e-cigarettes were intended to help adults quit smoking tobacco, vaping has clearly become the gateway for young people to get hooked. For policymakers, this presents a conundrum because the health benefits of e-cigarettes over tobacco smoking warrant keeping this option available for adults.

San Diego schools sue Juul Labs over youth vaping epidemic
NPR
San Diego's public school schools have filed suit against Juul Labs, Inc., the largest U.S. producer of e-cigarettes, accusing the company of deliberately marketing its vaping products to young people, effectively rolling back years of progress made by anti-smoking campaigns.

Study: Nearly 80 percent of youth feel safe vaping despite federal ban, widespread illness
KQED-TV
A recent ban by the Food and Drug Administration and the more than 2,500 reported vaping-related illnesses seem to have not deterred most young Americans in their vaping habits. According to a recent study done by Harmony Healthcare, nearly 80 percent of Americans between 18 and 38 years old actively vaping aren't concerned about the negative health effects.

Researchers identify vaping-related companies that promoted academic scholarships
NewsMedical.net
UNC School of Medicine researchers conducted a systematic online review and found 21 vaping-related companies, including websites, that promoted 40 scholarships to high school and college students in 2018 across the United States.
